

THE SIMPLE STUFF: Importance of Clean Gasoline

By Bob Vitrikas

Some things are worth repeating. In a previous article I wrote about the importance of using gasoline with a robust detergent additive in your car. The easiest way I've found to determine this is if the gas is rated "Top Tier." This web site will answer all your questions; <https://www.toptiergas.com/>

While reading one of my favorite magazines, 'Classic Motorsports,' I came across an article on the importance of using Top Tier rated gasoline. It cites a AAA study comparing Top Tier fuels to those not Top Tier rated. "After 100 hours running engines on a dyne, simulating 4,000 real-world miles - the non-Top Tier rated gasolines left 19 times more carbon inside the engine." Need I say more?
